

**Commercial / Industrial Evaporative Cooling
16,500 to 22,500 CFM Industry Standard Rating**

Features

- External static pressure range of 0.0" to 1.2" W.G.
- Factory tested and shipped ready to operate, including factory wired components
- ETL Listed and labeled in accordance with U.L. standards
- Copper-wound, heavy duty ball bearing motors
- One high capacity pump provides complete media saturation
- Self-aligning, heavy duty, greaseable, pillow block, ball type fan bearings
- Fan performance is factory set to job specific specifications
- Aspen wood fiber media with dust trap filter
- Lifting sky hooks
- Heavy gauge, hot dipped galvanized steel construction
- Epoxy powder base paint finish baked on at 375°
- Rugged cabinet assembly with double thick steel corners
- "Rain-Tight" pitched top construction (1/4"/12")
- Adjustable motor sheave for air flow adjustment

• 400 Series

• UMP-454

- Down Discharge
- Side Discharge

Available Options

- Class II, U.L. 900 media
- Control Packages
- Clean Pump
- Installation accessories
- Fused and non-fused disconnects

❶ 400 series, blower type evaporative coolers are designed for ducted applications with external static pressure ranges of 0.0" to 1.2". For straight down ducted low static applications with external static pressures ranges of 0.0" to 0.2" a UMP-500 series propeller type axial fan model may be recommended.

❷ Only motors 1 HP or less are provided with integral thermal protection. Motors 1.5 HP or greater require a separate motor overload device. Amperage ratings shown is nameplate data. Consult factory for overload and control options.

❸ Weights are in pounds and include motors, pumps and drives.

* Performance rating include the effects of the evaporative media, inlet louver, motor and drives in the airstream.

* Performance certified is for installation Type B: Free Inlet, Ducted Outlet

* Power rating (BHP) does not include transmission losses.
