

- *4,000 CFM to over 58,500 CFM as standard*
- *78 cataloged sizes*
- *Custom sizes available*
- *Indirect-only or Indirect-Direct cooling*
- *2" double or single wall construction*
- *ETL labeling available*

**• IDU Series**

- End discharge
- Down discharge
- Up discharge

## **Industrial Class Indirect / Direct Cooling Equipment** **4,000 CFM to 58,500 CFM at up to 1.5" ESP or higher if required**

**Why?**

Indirect-direct evaporative cooling provides an energy efficient solution for facilities that need effective cooling but find A/C to be too energy inefficient and cost prohibitive. Indirect-direct cooling is also a more effective system than standard evaporative units in that it can lower the supply air temperature by as much as 10°F.

**Benefits:**

- 78 different cabinet sizes available
- Available as indirect-only or as indirect-direct cooling module
- Can be used as a stand-alone module or incorporated into an AHU with additional filtration, heating and supply air fan
- Forward curved, airfoil or backward inclined wheels
- 2" double wall or single wall construction
- Heavy gauge galvanized, aluminum or stainless steel construction
- Epoxy powder base paint finish baked on at 375°
- Factory tested and shipped ready to operate, including factory wired components

- Fan performance is factory set to job specifications
- ETL listed and labeled in accordance with U.L. standards
- Indirect-direct cooling has a smaller carbon footprint than A/C
- CFC free (helping to achieve LEED certification)

**Applications:**

- Aircraft hangars
- Clean room M.U.A.
- Data centers
- Food processing plants
- Gymnasiums
- Hospitals
- Kitchens
- Make up air requirement
- Manufacturing facilities
- Military bases
- Municipalities
- Prisons
- Process cooling
- Schools
- Textile industries
- Warehouses
- Waste water treatment facility
- Retail center
- Wholesale club

**Available Options**

- Pre-wired control packages
- Automatic freeze protection
- Indirect-only module
- 2" Pre-filters
- Any accessories usually available with a custom air handling unit
